

Nanotechnology Meets Quantum Information (NanoQI)

10.Jul - 14.Jul 2016

Cod. 119-16

Mod.:
Face-to-face

Edition
2016

Activity type
Workshop

Date
10.Jul - 14.Jul 2016

Location
Miramar Palace

Languages
English

Organising Committee

Fundación
BBVA

Description

Seven leading experts will review the experimental and theoretical state-of-the-art for some of the most promising implementations such as semiconductor quantum dots, superconducting circuits, defect centers in diamond, photonic crystal structures, or topological insulators and explore the prospects of quantum computing, quantum simulation, and the physics of quantum many-body systems. Ample time is allotted for discussions and the participants can present their research at a poster session.
