Descripción

Objetivos

Short description of nature and aim of conference and/or session titles

This is the 9th edition of a School whose purpose is the training of PhD students and young Doctors in the field of Organometallic Chemistry and Homogeneous Catalysis.

The School will have the participation of eight prominent researchers from European universities and research institutes, along with one from industry. They have been invited to present their own results by means of an oral presentation (aprox. 50 min. total duration + 10 min. for questions):

- Cristina Nevado (University of Zurich)
- Andrew Weller (University of Oxford)
- Antoine Baceiredo (Université Paul Sabatier)
- Jan-Erling Backvall (Stockholms Universitet)
- Erick Carreira (Swiss Federal Institute of Technology of Zurich)
- Irina Beletskaya (Moscow State University)
- Belén Martín (Stockholms Universitet)
- Robert Paton (University of Oxford)
- Ricarda Müller (Bayer CropScience SAS)

Furthermore, the young Doctors will have the opportunity to share the achievements of their research activity by means of short communications (aprox. 15 min.) and some students will be invited to deliver flash presentations (aprox. 5 min.) to reinforce their poster contributions. All the presentations are given in English, the official language of the School.

The first edition of the International School on Organometallic Chemistry "Marcial Moreno Mañas" was held in 2008, and besides being the annual training meeting of the members of the ORFEO-CINQA team is open to the participation of the whole scientific community
