IBERLEF: Workshop aiming at encouraging and promoting the development of Human Language Technologies (HLT) for Iberian languages (Spanish, Portuguese, Catalan, Basque and Galician), by creating series of evaluation and a discussion forum about Natural Language Processing systems on an ongoing basis. [Link to the 2018 edition](#)

INFODAY: Infoday on Actions of the Plan to Promote Language Technologies in Healthcare, promoted by the State Secretariat for Digital Advancement and Red.es. Promoted by the Secretary of State for Digital Advancement information will be given on the opportunities offered by language technologies in the development of the Spanish information technology industry for Healthcare and in the improvement of the provision of public health services.

Tecnoing: Technology and Linguistic Applications Show. The aim of this exhibition is showing the latest technological advances of the linguistic industry. The event holds companies, universities or research centers related to linguistic technologies such as automatic translation, reputation management, systems of dialogue, text mining, Creation of Abstracts, Linguistic Processing Chains, etc. These technologies have direct interest for companies and public administrations of a wide range of sectors (Bank, Health, Pharmacy, Media, Tourism, Justice, Education, Security, etc.)
